

# 系友通訊

《時空》自第二期（民國五十四年）起即有〈系友來鴻〉專欄，中間曾改名為〈聽！海外的聲音〉、〈系友通訊〉等，可說是《時空》中，除了〈編者的話〉以外，最長壽的專欄。一直以來，〈系友通訊〉的內容大都是畢業的學長姊來信問候與鼓勵，或是說明自己的近況；能讓現在的學生聽到學長姊聲音，我們相信這是《時空》所肩負的責任。本期〈系友通訊〉收錄了數位系友的來信，尤其可以看到系友們對《時空》的感懷……

Dear Mr. Mao,

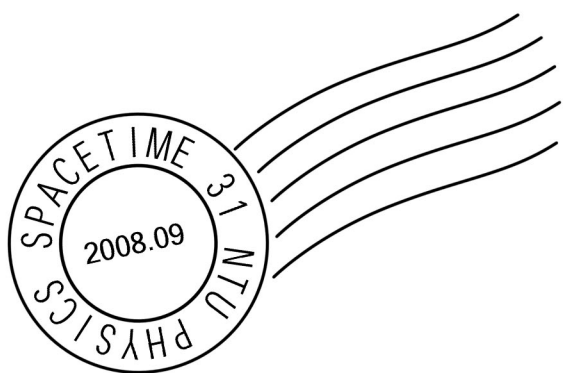

Thanks for your invitation. I think reviving SpaceTime is a good idea, and I am willing to help.

Instead of making time to write a new piece, I propose contributing two OLD pieces:

1. "Montreal Vignette 1964"

[http://sansan.phy.ncu.edu.tw/~hcleee/chn/Vignette\\_Montreal1964.pdf](http://sansan.phy.ncu.edu.tw/~hcleee/chn/Vignette_Montreal1964.pdf)

I wrote this in 1993-4, soon after my return to TW to teach at Chung-Hsing Univ. I think instead of the title I gave it then, we can change it to "牛肉".

# 時空三十一

## 2. "Eulogy: Darwin Chang (1955-2006)"

[http://sansan.phy.ncu.edu.tw/~hcleee/chn/Eulogy\\_DarwinChang0602.pdf](http://sansan.phy.ncu.edu.tw/~hcleee/chn/Eulogy_DarwinChang0602.pdf)

I wrote this and read it at the funeral for 張達文 in 2006. He is an alumnus of the phys dept, probably 1977. The PDF text does not have a title. I suggest: "我的朋友張達文".

Feel free to use or not use either of the pieces.

My webpage is:

<http://sansan.phy.ncu.edu.tw/~hcleee/index.html>

(or simply Google: HC Lee).

Sincerely,

hc lee

茅耀元同學：

很高興收到你的來信。《時空》後繼有人，起死回生，特別令參與草創《時空》的我感到振奮。

我於 1966 年畢業後，次年前往芝加哥大學物理研究所深造。考過博士資格試後發起創辦《科學月刊》。世事多變，脫離物理的研究，然對科學之美未嘗忘懷也。近年多致力於教育工作，包括科學的通識教育教學，在清大，交大，成大等學校開過《時間的探索》，《空間的觀念》，《對稱之美》，《混沌現象》，《愛因斯坦的革命》，《科學經典導讀》，《無限之謎》，《數學與文化》等等課程，多與物理學有關。

我們那屆同學頗有人回台服務，如顏晃徹（已去世），倪維斗，劉源俊，劉容生，蔡尚芳，吳幸田，等等。

物理是迷人的知識領域，也是眾多學科的基礎。透過你們的努力，幫助系友的聯繫與向心力，也會有助於物理知識的普及。

祝 編安

Thank you for letting us know.

Life of physics graduates varied a lot. If you have any specific topic you would like alumni in the US to address, you can spell it out. Maybe people will be more likely to write something up for that.

Example: Physics and Silicon Valley, Physics and Financial Market, Entrepreneurship, Etc...

Take courage for the good work.

Steve

Dear editor of Space-Time,

Attached please find a short contribution from me.

## 附件：《推介生物物理》

我近年做的主要是「生物物理」方面的工作。我認為這是一個很有前途的領域。目前在生命科學中有許多非常重要的問題仍未解決（甚至連問題是什麼還不清楚）。故未來能有重大發現的空間很大。現在從事生命科學研究的人，大部分使用生物化學的手段。有些問題用生物物理的辦法來探討可能更為有效（如用 biophotonic 偵測單分子活動或在活細胞中研究某種訊號機制）。同學們可以注意這些方面的發展。

如物理系的同學在這方面有興趣，我建議他們在大學時應起碼去修一門課，就是「細胞生物學」。另外「Scientific American」雜誌上有些綜述文章也值得不時去看看。

謝謝您們的來信，時空雜誌在我們成長的歲月是非常重要的。

我會想想我可以寫些甚麼。

Dear Yaoyuan:

Thank you for your message. Because of your message, I had a chance to view the previous volumes of Spacetime. I contributed two articles to Spacetime 23. Gee! That was already more than 20 years ago. However, you are working on the 31st volume? Only 7 volumes were published in the past 20 years.

I also found many familiar names from other volumes: like Luo-Chuan Lee, who is the president of National Central University now, Sy-Sang Liao is the professor of Chung-Hsin U., Sho-How Lin is the professor of Tsing-Hua U., ...

I am and will be very busy in the next few months. If you want a contribution from me recently, I am sorry that I can not do it this time.

Best regards,  
Hsiang-nan,

學弟你好,

很高興收到來信，看到新生代的人在為著一件事努力著也很令人欣慰。

我畢業後就不在物理學界發展，一直在軟體工程的應用領域做開發做管理。現在長住上海。我只在 27 期上插花過一篇文章。對於你們的系刊，如果這樣的背景還能幫上什麼忙，請不吝告知。

Best Regards,

Hi Mr. Mao,

This is Sheau-Jiung Lee, 76 graduate. I am the classmate of current chairman, Dr, Hsiung. I like to donate NT\$2k specifically for space-time. The amount is not big but just show my support of our space-time. Let me know how to proceed this donation.

Regards,  
S.J.

I am in both bay area and Taipei. However, I will meet Professor Yee Hsiung on the coming weekend. I see how I can do it. It was fun, I did edit one of space-time back to 1974 or 1975.

Regards,  
S.J.

Dear Yaoyuan:

Thanks for the e-mail on SpaceTime in NTU's Physics. I was the Editor-in-Chief in 1972 (the class of the famous 1973) for the SpaceTime.

I know that it is not an easy job for you and your editors in the time of heavy course taking. I have been very busy in research since I returned to Taiwan in 2003 after 28 years in US.

I may drop by to chat with you folks when I come to Taipei or Taida for meetings or business.

Take care, and all the best,  
Minghwei

Dear Yaoyuan:

Great!

I will notify you when I come to Taida next time. In the meantime, please say hello to my beloved Professor Ching-Liang Lin.

take care,  
Minghwei

Hi Space-Time and Yaoyuan:

It is great to hear from the Space-Time! I myself was the president of the physics student association in 1972 (such a long time ago!), and have deep feeling about the Space-Time. At this time I just want to offer my encouragement and

congratulations to the good work you do and plan to do. You have audience in me, for one.

I attach the current directory of the Class of 1973. You can add in the e-mail addresses if you haven't.

Thank you for the effort,  
趙丰

Thank you for the e-mail. Sorry, I can't reply in Chinese. My PC isn't equipped for that.

It is admirable that you would try to revive the 'Space Time'. However, there is nothing I can contribute to the success of your endeavour. You have to rely on your friends and classmates to make it happen. Only you and whoever discover the need of having this periodical continued would know how to and have the willingness to accomplish it.

Good luck!
